DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 15-24 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 and 17 of copending Application No. 09/684,129 in view of Warther et al. (6,039,356). Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference between the present claims and the co-pending claims is the present claims claim "at least one of a front and a rear card panel" and "a magnetic strip patch immovably secured over said card region on an outer surface of a magnetic strip panel" and the co-pending claims claim "a front and a rear card panel". The present claims are claiming that there could be one or more front and rear card panels. The co-pending claims are claiming that there is only one front and rear card panel. Since the present claims claim at least one front and rear card panel, one having ordinary skill in the art would conclude that it would have been obvious to provide only one set of front

Art Unit: 3722

and rear card panels as presently disclosed in both the present claims and the co-pending claims. Further, Warther et al. disclose a printed sheet having a plurality of scored cards having front and rear card panels situated in a side-by-side relationship with encoded magnetic strips (as seen in figure 2). Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention to modify the present claims ('129) to include more than one card panel having front and rear card panels having encoded magnetic strips, as taught by Warther, to enable the user to manufacture a number of cards using one single sheet of paper, thus reducing the cost associated with printing the individual cards and provide encoded information on the cards.

This is a provisional obviousness-type double patenting rejection.

Response to Arguments

3. Applicant's arguments with respect to claims 15-24 have been considered but are moot in view of the new ground(s) of rejection.
